

# Transforming Product Lifecycle Management (PLM) for Industry Leaders

End-to-End PLM Solutions  
for Digital Transformation

**Your vision is our mission**

Transition Technologies PSC – Global Premium IT Solution Integrator

**TRANSITION**  
TECHNOLOGIES

## \_Challenges of the target group

In today's highly competitive market, manufacturing and engineering companies face increasing pressure to:

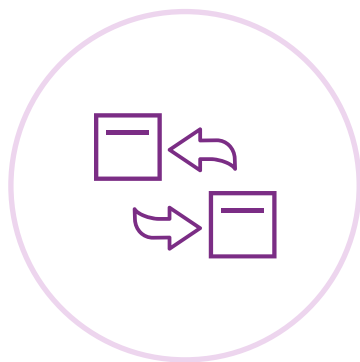

- ✓ **Accelerate product development cycles** while maintaining quality and compliance.
- ✓ **Reduce operational costs** and eliminate inefficiencies.
- ✓ **Integrate fragmented IT ecosystems** across departments and global teams.
- ✓ **Improve traceability and data consistency** across the entire product lifecycle.
- ✓ **Ensure seamless collaboration** between design, production, and aftermarket services.

# **— Big picture of the solution**

Transition Technologies PSC provides a fully integrated PLM ecosystem tailored to the unique challenges of industrial leaders.

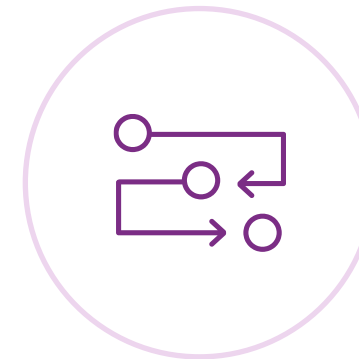

By leveraging cutting-edge technology, cloud-based infrastructure, and deep domain expertise, we enable companies to:

**Enhance data governance and collaboration across departments**

**Optimize cost efficiency and resource utilization**

**Streamline product development and lifecycle management processes**

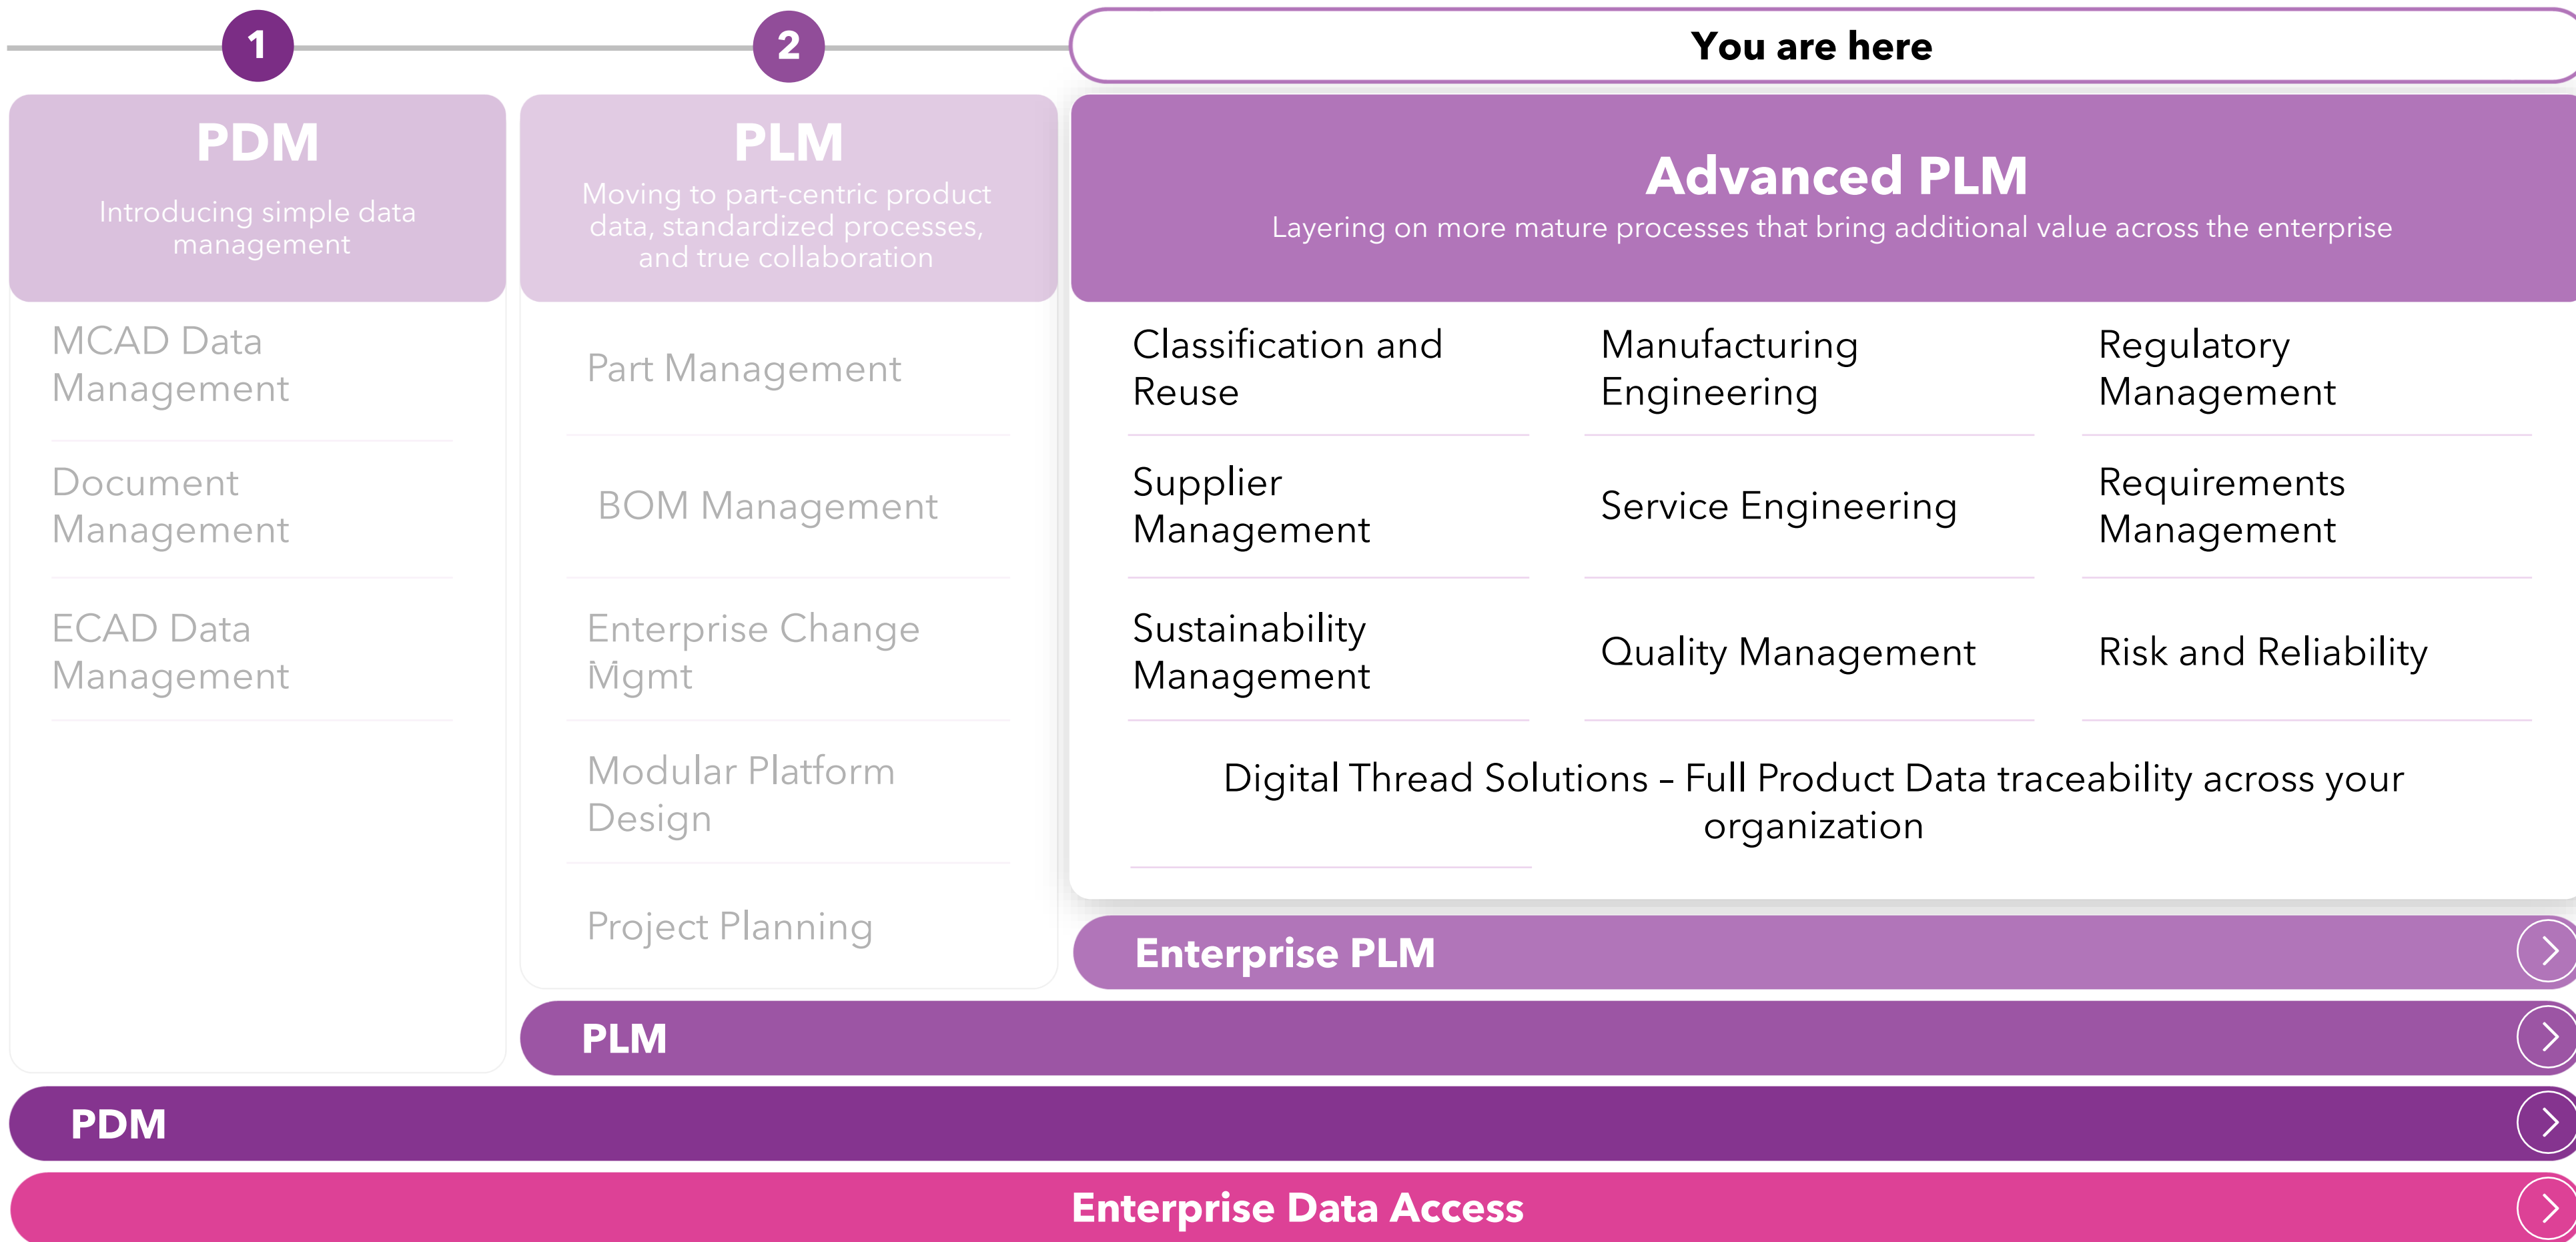

**Ensure regulatory compliance and quality assurance**

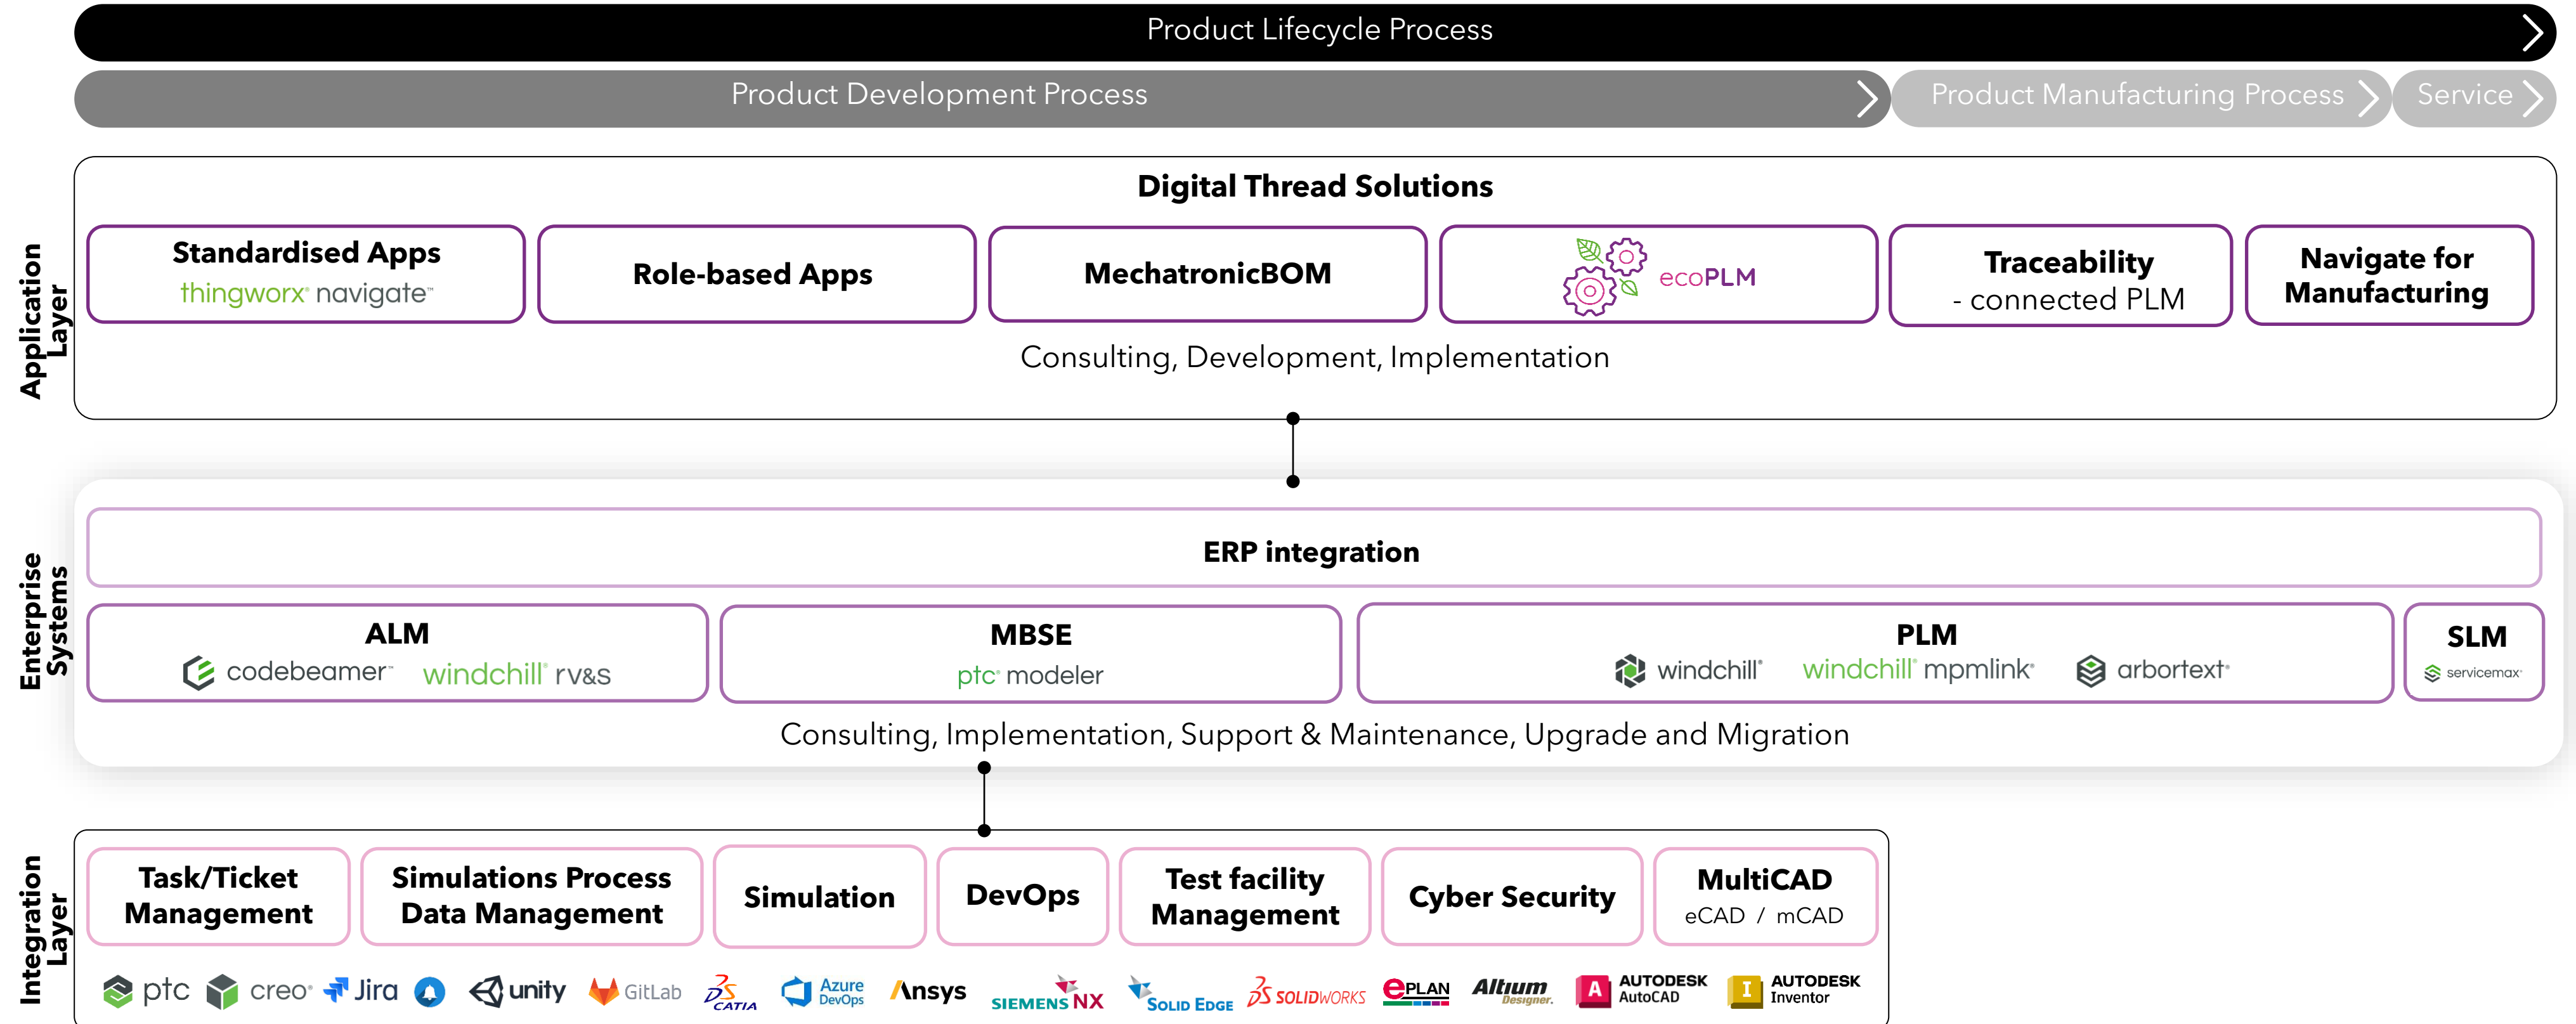

**Accelerate innovation through advanced analytics and AI-driven insights**

# The Path to Effective PLM - From PDM to Enterprise PLM

# \_Product Engineering Digital Thread Solutions

Consulting, Development, Implementation, Support & Maintenance - Data Experts for Product Data

\_Your vision is our mission

## **Features of the solution**

**01**

**Integrated PLM Platform**

**Centralized system** for managing product data, processes, and workflows

**02**

**Seamless ERP & CAD Integration**

**Eliminates silos,** ensuring a single source of truth

**03**

**Advanced Change Management**

**Enables controlled product modifications** with full traceability

**04**

**Digital Thread & Digital Twin**

**Provides real-time monitoring** and simulation capabilities

**05**

**Scalability & Cloud-Readiness**

**On-premise, hybrid, or cloud deployments** to fit business needs

# **Our Expertise - Why choose Transition Technologies PSC**

## **20+ Years of Global PLM Expertise**

Proven track record in delivering PLM solutions worldwide **World-Class Experts**  
- A global team, including top PLM specialists from Germany and beyond (200+ experts).

## **PTC GSI Partner Status (top level)**

Recognized as a top-tier PTC partner and **Partnership with PTC Professional Services**  
- Ensuring best practices and seamless implementations

## **Experience with Enterprise Clients**

Deep understanding of market needs and implementations and process best practices

## **End-to-End PLM Solutions**

From installation and migration to customization, cloud, AI, and tech support.

## **Exclusive Collaboration with PTC R&D**

Perfect alignment with the PTC road map and deep know-how on the product technical best practices

## **Innovation in PLM**

Pioneering solutions like EcoDesign and cutting-edge digital transformation.

# \_Customer Reference - Real-World Success Stories

**The Transition Technologies PSC team showed an exceptional level of commitment to delivering quality service while respecting timelines.**

They went above and beyond our expectations in the way they responded immediately to all our requests and advised us on how to effectively resolve any arising technical issues. We have been pleased to experience firsthand TT PSC's technology expertise that assured the quality of service required to successfully implement this project.

**Robert Wolf**

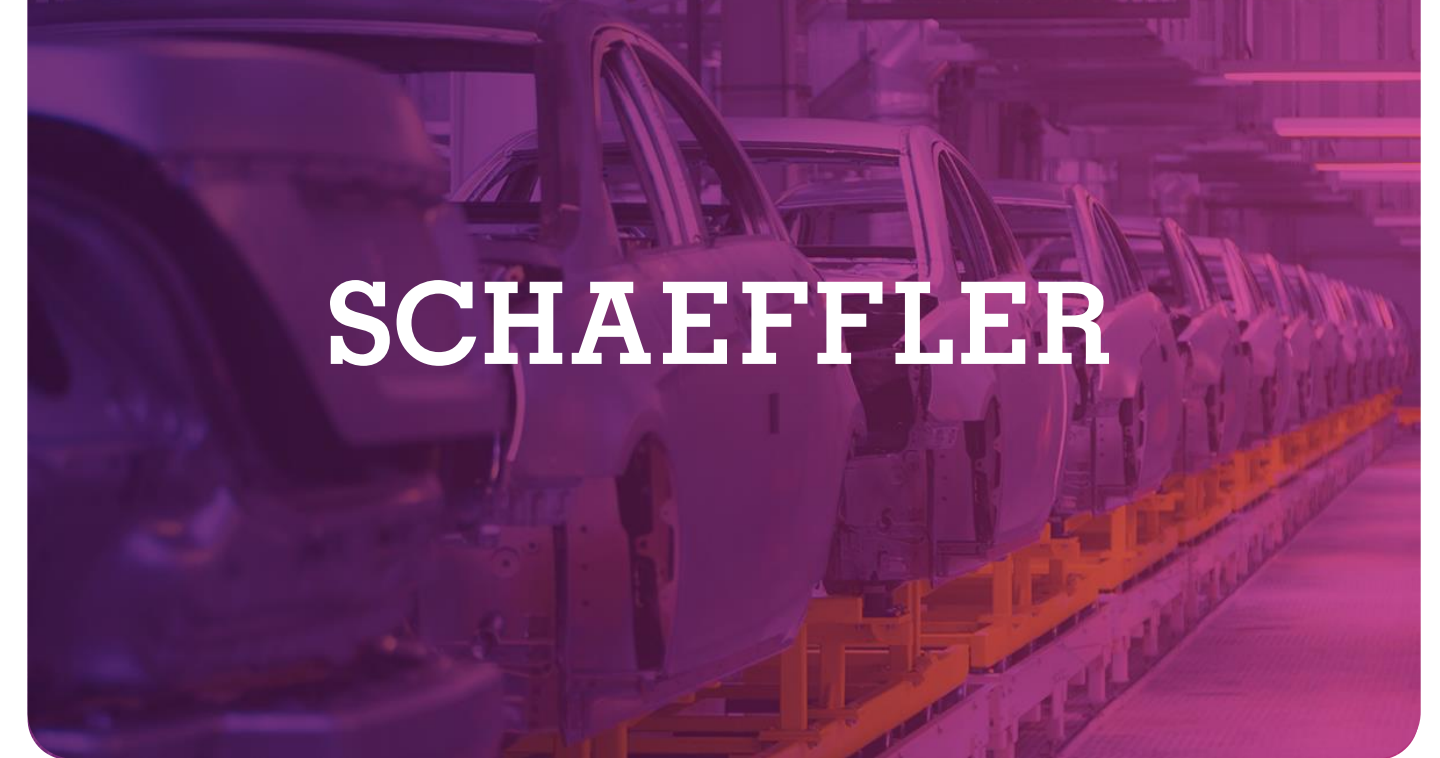

Manager Product Owner PLM-Workplace, Schaeffler

## The challenge

Schaeffler, a leading global supplier to the automotive and industrial sectors, required a scalable PLM solution to streamline engineering processes and optimize supply chain management

## Solution

TT PSC delivered a fully integrated PLM system, automating workflow processes and enabling better control over product iterations.

## Benefits

- Increased efficiency in product design and development
- Reduced time-to-market for new innovations
- Seamless integration with ERP and manufacturing systems

# \_Customer Reference - Real-World Success Stories

**“ The TT PSC team has shown exceptional commitment as a systems integrator and agility in delivering a new solution for our company.**

Technological progress is a key element in the growth of any industrial company. We know that in addition to product development, we must also bet on digital transformation. The Transition Technologies PSC team has shown exceptional commitment as a systems integrator and agility in delivering a new solution for our company. We are very pleased with the way the TT PSC team supported us with subject matter expertise and guided us through the complex PLM Windchill implementation processes. We are pleased that the entire project went very smoothly and that our staff was prepared and comprehensively trained for the next steps and iterations.

**Leszek Szulc**

Technical and Production Director, Chairman of the Digital Transformation Steering Committee, SaMASZ

## The challenge

SaMASZ, a leading agricultural machinery manufacturer, needed a PLM system to manage growing product complexity and documentation.

## Solution

TT PSC implemented a PLM platform tailored to SaMASZ's needs, enabling efficient configuration management and digital documentation control.

## Benefits

- Improved product data accessibility
- Enhanced efficiency in managing product versions and configurations
- Reduction in administrative workload for engineers

PLM System for agricultural machinery manufacturer  
- **SaMASZ**

# Driving Client Benefits with PLM

## **Accelerated time-to-market**

Faster product iterations and launches.

## **Cost reduction**

Optimized resource allocation and minimized rework.

## **Data-driven decision making**

AI-powered analytics for better forecasting.

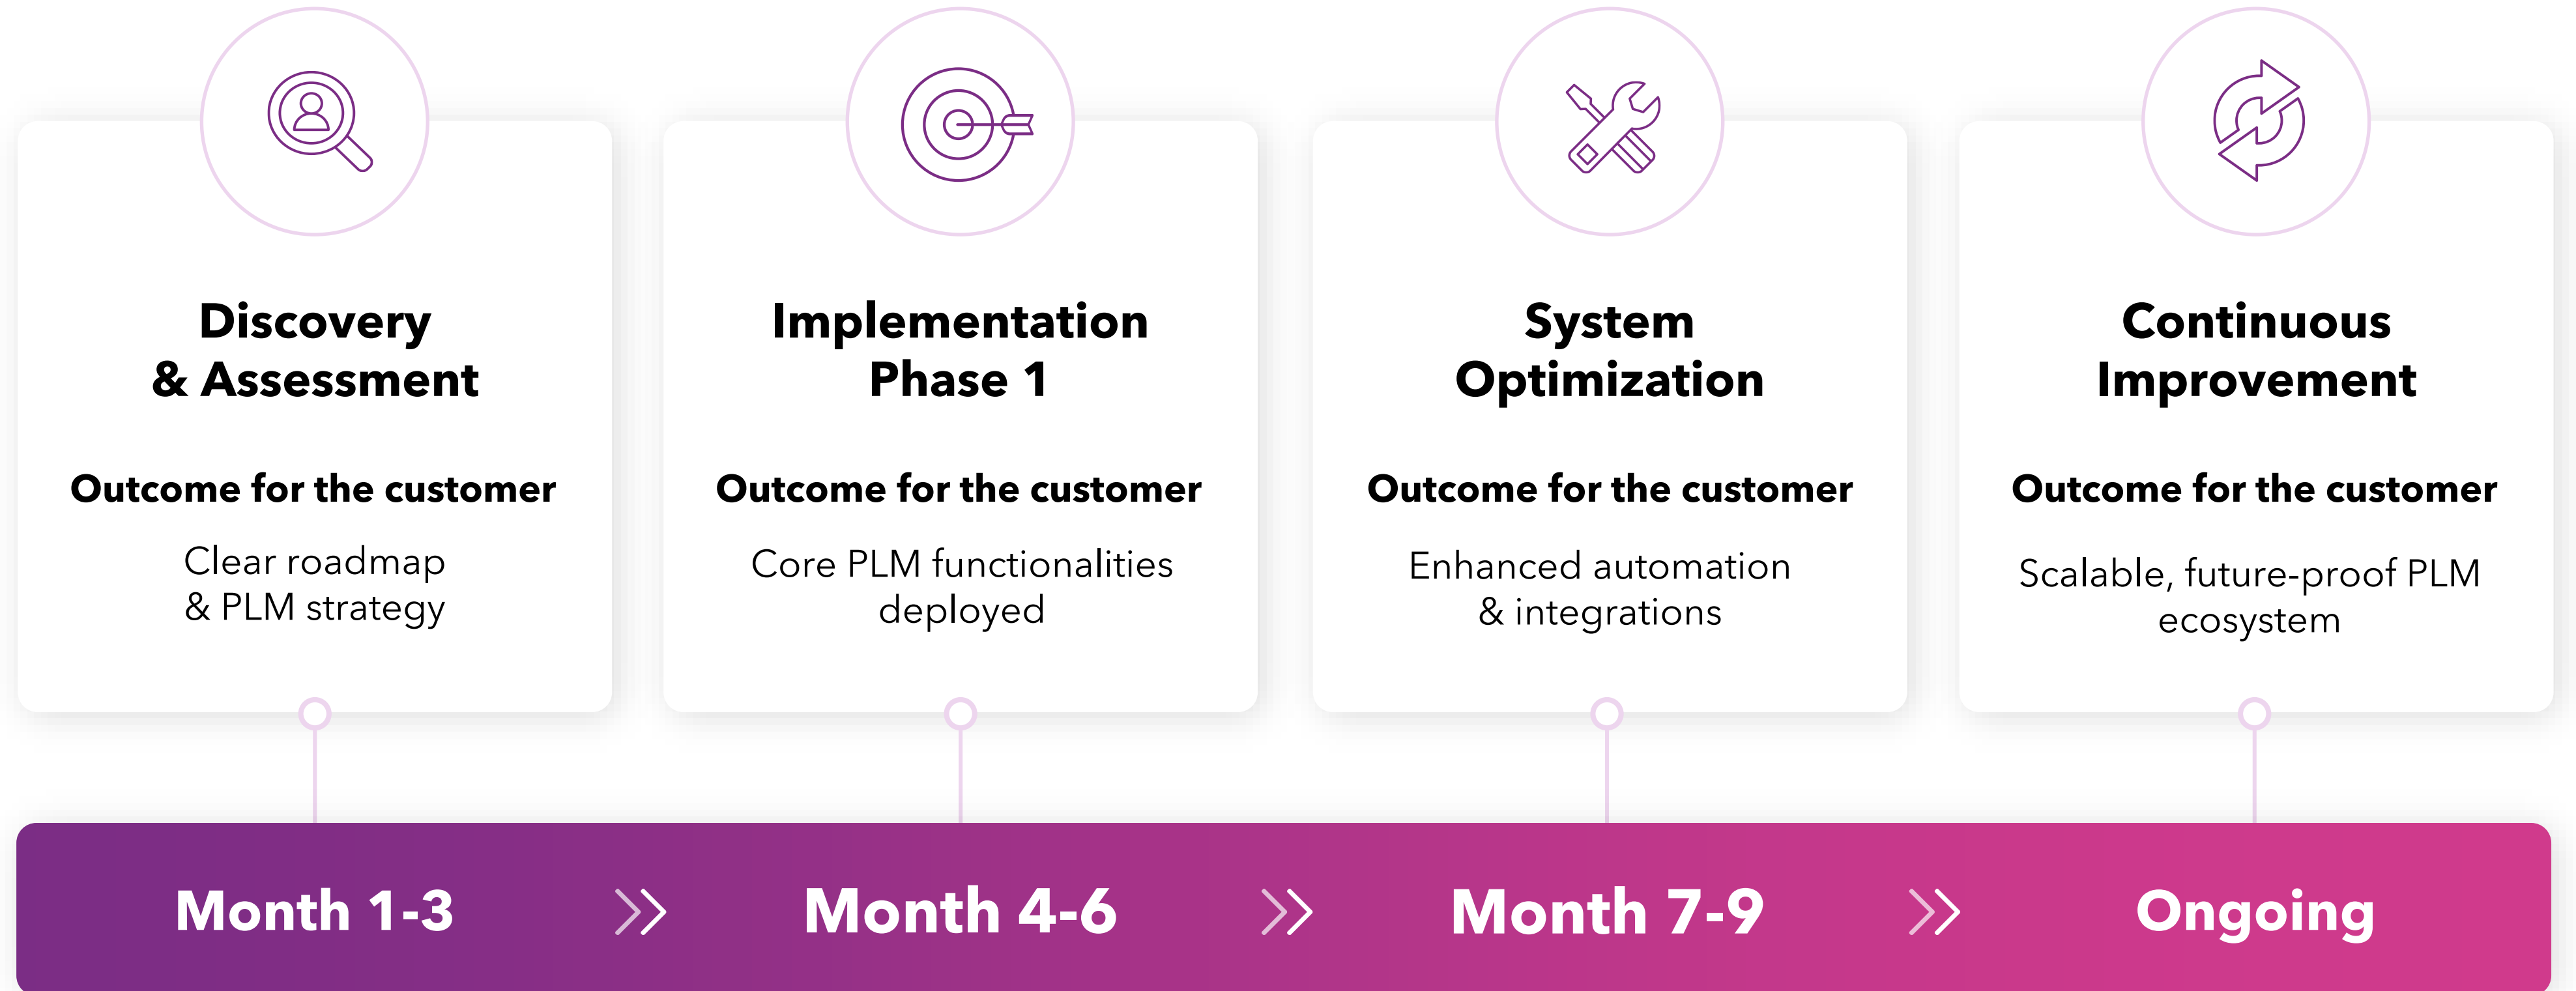

## **Enhanced customer satisfaction**

Higher product quality and faster response times.
